CRAFT TIME from ROMANIA. Did you know that peonies are Romania's national flower? Try to make one or more paper peonies!

How to Make Paper Peonies

SUPPLIES (PER FLOWER):

- 2 squares of yellow tissue paper
- 6-8 squares of pink or peach tissue paper
- Scissors
- Stapler

DIRECTIONS:

1. Stack your peach and yellow and fold it, accordion-style — 8 to 10 folds.
2. Staple in the middle.
3. Cut the ends of the folded tissue rounded.
4. Carefully start to separate the layers of the peony. Pull from the inside of each layer, as opposed to out on each edge. This will help keep the flowers from tearing.
5. Keep fluffing the layers until you have half the flower, then fluff the other side. Once you have it all fluffed, crumple the yellow pieces to create the center of your peony. Fluff the petals around the center, keeping it sort of cup-shaped like a real peony.
