PURPOSE

This procedure ensures that the types of medical treatment undertaken on a Medical Mission trip remain within its defined scope in keeping with the Mission Teams Policy.

FORMS AND REFERENCE DOCUMENTS

Title	Description

PROCEDURE

One More Child (OMC) facilitates Medical Mission Trips, including approved dental services, for which OMC identifies specific types of medical evaluations and levels of care that will be given to the residents of the community in which services are provided. Medical mission teams, and medical team members, are approved by the Executive Directors of Global Programs and Engagement.

Although members of a mission team may have medical training and expertise that exceeds the types of treatment offered, treatment services shall be kept within the scope of the Medical Mission Trip at all times.

Mission Team members holding a current medical license may prescribe and dispense medications and perform minor treatments as their limited resources allow. They will refer the patient to a local health professional if they believe further assessment/treatment is needed.

Teams with non-licensed physicians, such as pre-med university students, may only interview, take vital statistics, and recommend patients follow up with a local health professional. Team members are not allowed to perform any services they are not certified/licensed in the United States to do.
